

# Armow Wind Project

## Community Liaison Committee Meeting #3

### About the Project

The Armow Wind Project is an approximately 180 megawatt commercial wind energy generation facility located in the Municipality of Kincardine, Bruce County, Ontario. The Armow Wind Project is expected to generate enough clean energy to power 55,000 homes. The Project is being developed by SP Armow Wind Ontario LP by its general partner SP Armow Wind Ontario GP Inc. (Armow Wind), which obtained approval from the Ministry of the Environment and Climate Change (MOECC) in October 2013 to build a Class 4 Wind facility.

### Establishment of a Community Liaison Committee

Armow Wind has established a Community Liaison Committee (CLC) to act as an advisory body and to discuss the important aspects of construction, installation, use, operation, maintenance and retirement of the Armow Wind Project. While this committee is a requirement of Armow Wind's Renewable Energy Approval (REA), it is also a vital part of their continued commitment to communicate and provide a forum to share ideas, express concerns and to provide the community with ongoing updates about the Project. The Committee consists of eight (8) members from the community, with membership being drawn from a cross-section of the local community in order to provide a broad and balanced perspective.
